# Remuneration of the Board of Directors and Senior Executives

## Guidelines for determining remuneration of senior executives

In compliance with a motion to be addressed by the 2011 Annual General Meeting, the Board of Directors proposes that the following guidelines shall apply up to the 2012 Annual General Meeting. The guidelines are to apply to all employment contract entered into after the resolution by the Annual General Meeting and to all amendments to existing agreements that are made after the Meeting's resolution.

Remuneration of the President and CEO and other senior executives shall consist of a well-balanced combination of fixed salary, annual bonus, long-term incentive programs, pension and other benefits and conditions concerning termination of employment/severance payment. The total remuneration shall be competitive in the market and based on performance. The fixed remuneration shall be determined individually and based on each individual's responsibility, role, competence and position. The annual bonus shall be based on outcomes of predetermined financial and individual objectives and not exceed 30–50% of the fixed annual salary.

In exceptional situations, special remuneration may be paid to attract and retain key competence or to induce individuals to move to new places of service or accept new positions. Such remuneration may not be paid out for periods exceeding 36 months and may not exceed the equivalent of twice the remuneration the executive would otherwise have received. The Board of Directors may propose that the General Meeting resolve on long-term incentive programs.

Pension benefits shall be based on defined-contribution plans and, for employees in Sweden, shall provide entitlement to pension at age 65. Upon termination of employment by the company, the notice period for the President and CEO is 12 months and for other senior

executives six months. In addition, when entering into new employment contracts, agreement may be made on severance pay not exceeding the equivalent of 12 months' fixed salary. The Board shall be entitled to depart from the guidelines if there are specific reasons for doing so in individual cases.

The above guidelines are essentially unchanged in relation to the guidelines adopted by the 2010 Annual General Meeting. For additional information concerning remuneration of senior executives, refer to Note 8.

## Remuneration of the Executive Committee in 2010

### President

In 2010, the President and CEO received a fixed salary and variable salary as detailed in the table below.

In addition to a reciprocal 12-month period of notice, the President will, in the event of termination of employment by the company, receive severance pay equivalent to 12 months' salary. In the event of resignation by the President, no severance pay may be claimed.

The President's pension benefits are premium-based and comprise an ITP scheme and an annual provision for 25% of fixed salary exceeding 20 "basic amounts" (base figure for Swedish social security). Retirement age is 65.

### Other senior executives

According to guidelines approved by the Annual General Meeting, the President, in consultation with the Board's Compensation Committee, prepares remuneration issues concerning Group and divisional management, which are subject to resolution by the Annual General Meeting. Compensation consists of a fixed salary and a variable salary.

## Remuneration of Executive Committee 2010, SEK thousands

	Basic salary	Variable remuneration	Pension
<b>President</b>			
Joakim Olsson	4,112	1,951	882
<b>Other senior executives (Executive Committee)</b> (6 people, of whom 0 women)	11,290	6,062	2,760

The variable part is based on goals established by the President and the Compensation Committee on a yearly basis and may amount to 30–50% of the fixed annual salary. All members of the Executive Committee have a reciprocal six-month period of notice and, in the event of termination of employment by the company, will receive severance pay equivalent to between 12 and 24 months' salary. Due to the proposed demerger of the company's divisions into independent listed companies and in accordance with special guidelines formulated by the Board, specific and time-limited agreements have been drawn up with the President and certain members of Group Management comprising periods of notice and severance pay, in order to safeguard the services of these key individuals during the implementation of the proposed demerger. The pension benefits are regulated in pension plans adapted to local practice in the countries in question, with the retirement age starting at 65.

#### Incentive program

The Annual General Meetings in 2007 and 2010, respectively, resolved to introduce a long-term performance-based incentive program under which senior executives and key personnel would be allotted employee stock options on condition that the participants become shareholders by making their own investment in Haldex shares in the stock market.

Under the 2007 program, each share acquired in the market provides entitlement, free of charge, to an allotment of ten employee stock options, whereby each option provides entitlement to the acquisition of 1.5 Haldex share.

A condition for allotment is that Haldex's pretax income has increased in relation to the preceding fiscal year by more than 7%. Maximum allotment occurs on condition that pretax income has increased in relation to the preceding fiscal year by 20% or more.

Employee stock options can be issued in three series and, in accordance with decisions by the Board of Directors, could be allotted during 2008, 2009 and 2010.

No allotment of the 2008 or 2009 options occurred on the basis of the company's earnings outcome. However, an allotment occurred during 2010. For further information, see Note 8.

Under the 2010 program, each share acquired in the market provides entitlement, free of charge, to an allotment of ten employee stock options, whereby each option provides entitlement to the acquisition of 1.0 Haldex share. A prerequisite for allotment is that the company's operating margin exceeds 1%, excluding restructuring costs and non-recurring costs/revenues from acquisitions or divestments during the 2010 fiscal year. Maximum allotment will occur if the company's operating margin, subject to the above, exceeds 4%. The employee stock options will be allotted based on the company's earnings outcome in 2010 and in accordance with decisions taken by the Board during 2011. Allotment will occur in 2011.

#### Remuneration of the Board of Directors for the period April 2010 – June 2011

Remuneration of Board members elected by the Annual General Meeting is approved by the Annual General Meeting following proposals from the Nomination Committee. For 2010, remuneration was paid in accordance with the table below. All remuneration of the Board comprises fixed payments and does not contain any variable parts. No remuneration is paid to members who are employed by the Group.

# Internal control and risk management

Internal control at Haldex is a process that is regulated by the Board of Directors and the Audit Committee and performed by the President and the Executive Committee. It is designed to ensure that to the greatest extent possible Haldex's reporting is appropriate and reliable and that the company complies with applicable legislation and regulations. The process is based on a control environment that provides structure for other parts of the process, including risk assessment, control activities, information, communication and follow-ups. It is based on the framework for internal control published by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

According to the Swedish Companies Act and the Swedish Code of Corporate Governance, the Board of Directors is responsible for internal control. This report on internal control and risk management was prepared in accordance with The Annual Accounts Act and the Swedish Code of Corporate Governance and is thus limited to a description of the material elements of Haldex's systems for internal control and risk management with regard to financial reporting.

The Board of Directors monitors and ensures the quality of external financial reporting in the manner documented in the Operating Procedures of the Board of Directors, the Instructions for the President and the Group's Treasury Policy

It is the responsibility of the President together with the CFO to review and quality-assure all external financial reporting, such as interim reports, year-end reports, Annual Reports, press releases containing financial information and presentation material in conjunction with meetings with the media, the owners and financial institutions. The President presents all interim reports, year-end reports and Annual Reports to the Audit Committee for preparation. The reports are then approved and published by the Board of Directors. The Board of Directors is responsible for ensuring that the company's financial

reports are prepared according to law, accounting standards and other requirements concerning listed companies.

The Board of Directors' instructions for the President also include requirements that the Board of Directors must be continuously provided with internal summary reports on financial matters. These reports, which must include income statements, balance sheets, valuation issues, assessments, forecasts, any changes and their consequences, possible amendments to accounting rules, legal matters and disputes, are reviewed by the Audit Committee and thereafter submitted to the Board of Directors. With regard to the Board of Directors' communication with the company's auditors, see below.

## Control environment

The Board of Directors has adopted a number of control documents for the company's internal control and governance.

Within the Board of Directors, there is an Audit Committee comprising three Board members elected by the Annual General Meeting: Arne Karlsson, Lars-Göran Moberg and Caroline Sundewall. The Audit Committee, which prepares matters for the Board of Directors, considers such issues as the internal control process, follows up reporting issues and discusses accounting principles and the consequences of changes of these principles. Furthermore, the Audit Committee maintains regular contact with the external auditors. The Committee is responsible for evaluating auditing work and the auditors' efficiency, qualifications, fees and independence. In addition, the Audit Committee must assist the Nomination Committee in nominating auditors and procuring their services

## Risk assessment

Haldex's risk assessment with respect to financial reporting, meaning the identification and evaluation of the principal risks in terms of financial

reporting in the Group's companies, divisions and processes, provides the foundation for risk management. The risks may be managed by accepting the risks or by reducing or eliminating them, subject to the controls and control levels within the framework established by the Board of Directors, the Audit Committee, the President and the Executive Committee.

### Control activities

Work to enhance internal control activities and governance continued during the year, in the form of documentation and evaluation and improvements of existing controls. During 2010, the focus was on the inventory process. A control matrix concerning the inventory process, containing further developed minimum requirements for acceptable internal control, was implemented in the Group's units. In certain units, the external auditors implemented a follow-up of these controls of the inventory process during the year.

### Information and communication

The company has a system for information and communication that is intended to result in complete and correct financial reporting. The company has a reporting system in which all Group companies report monthly according to an established format and to fixed accounting principles. In conjunction with reporting, the reporting units perform risk assessments and decide on the need for any provisions. The central finance department produces reports from the Group-wide system, which is structured according to the Group's established reporting format. Responsible managers and controllers at various levels in the Group have access to the information in this system relating to their area of responsibility.

All of the Group's steering documents for internal control and governance are available on the Group's intranet.

### Follow-ups

The company's financial reporting is followed up continuously, in part by business management at various levels in the company and in part by the finance organization and controllers in the various divisions and business units. Follow-ups take place each month in conjunction with reporting and comprise both analysis and reviews by the relevant controllers and meetings between the relevant business managers and the reporting units. The CEO and the CFO have monthly meetings with divisional managers and divisional controllers. At these meetings, the division's income statement, balance sheet, cash-flow statement and other financial key data are discussed.

The Audit Committee communicates constantly with the company's external auditors and the CFO, both at and between meetings. The Board of Directors receives a monthly report on business development. More detailed reporting is provided primarily by the President at all Board meetings. The Board of Directors constantly assesses the risks relating to financial reporting based on significant and qualitative factors.

Each year, the Board of Directors evaluates the need to establish a special internal audit function. In 2010, the Board did not consider this necessary. The Board considered that internal control is primarily exercised by:

- operative managers at various levels
- local and central finance functions
- through the Executive Committee's supervisory control

Due to this, in combination with the company's size, the Board of Directors currently does not consider it justifiable in financial terms to establish yet another function.
