

Haldex Environmental Policy

Haldex contributes to society by providing innovative brake and vehicle control solutions to the global commercial vehicle industry, with focus on enhanced safety, environment and vehicle dynamics.

Environmental aspects and impacts play a major role in our corporate social responsibility and strategic direction, and is always one of Haldex priorities. For all production, distribution, remanufacturing sites as well as sales and R&D offices Haldex's environmental performance shall make a positive difference and effects on the global and local environment.

Haldex is committed to the protection of the environment, including prevention of pollution, sustainable resource use including air emissions, energy consumption, waste management, water usage and restricted substances and chemical handling. Haldex shall optimize and apply environmental responsible and sustainable management and practices of our current and future processes, equipment, technology and purchase of sustainable services and supply.

All Haldex sites are committed to fulfil and comply to these obligations, including local laws and regulations and reporting, and have environmental systems in place to monitor and improve the environmental performance. All our production sites' environmental management system complies with ISO 14001 requirements.

Haldex is committed to measurement and continuously improve its environmental performance and impact. Haldex sites apply standardized analysis and reporting (Green Performance Map) to identify how much material, energy and resources are consumed, and the emissions and waste that it generates; measured and reported as total material efficiency and CO₂ emissions.

The environmental performance and sustainability are key aspects for products. Haldex assess the environmental impact of the design of products (Green Product Assessment), as a formal decision making basis for product development to ensure environmental performance and sustainable design of products.

Haldex is also committed to sustainable sourcing, with clear criteria and expectations for current and potential suppliers and partners to meet or exceed Haldex requirements.

This environmental policy is communicated within the organization, is a mandatory reference for additional other environmental policies and procedures. All Haldex employees are expected to follow the requirements and guidance outlined in this policy. Additionally, it is also available to external interested parties.
